Problem–SolutionFit Template

The **Lease Management System in Salesforce** helps manage all lease details in one place, reducing manual errors and missed deadlines. It sends automatic reminders for payments and renewals while storing documents securely. This system saves time and improves efficiency for property and finance teams.

Purpose:

To store and manage all leased details like tenant info, payment dates, and contract terms in one place.

1. To send automatic reminders for rent payments, renewals, and expirations.
2. To reduce manual work and errors caused by using spreadsheets or paperwork.
3. To track lease performance and revenue through reports and dashboards.
4. To improve communication and efficiency between property, finance, and management teams
